

2025 Electric Supply Environmental Attribute Information

The electric supply product you have purchased from First Point Power meets the minimum requirements of the Commonwealth's Renewable Energy Portfolio Standard.* By law, First Point Power is required to disclose to customers the following non-price information related to the product: (i) power sources; (ii) air emissions; and (iii) labor characteristics.

GENERATION PRICE

Average price per kWh at different levels of use. Prices do not include regulated charges for customer service and delivery. *

Please refer to your specific contract or contact First Point Power at (888) 875-1711. Your average generation price will vary according to when and how much electricity you use. Please refer to your most recent bill for your monthly use and the contract terms and conditions for actual prices.

CONTRACT

Contract Terms: You will receive a Fixed Price; Percent Fixed & Index; Block & Index; Renewable Select; or First Green electricity supply price for the number of months specified in your Commercial Agreement.

Minimum Length: Please refer to your specific contract per your term length.

POWER SOURCES - DISTRIBUTION OF RESOURCES

First Point Power procures 100% of its power from the New England System Mix. This data was made available by the Massachusetts Department of Public Utilities on their website.

Power Sources	System Power
Biomass	0.00%
Coal	0.04%
Hydro	0.20%
Imported Power	14.40%
Municipal Trash	0.10%
Natural Gas	78.70%
Nuclear	0.30%
Oil	4.90%
Other	0.10%
Solar Photovoltaic	0.80%
Wind	0.10%
Total	100.00%

* Total % may not equal sum due to rounding.

AIR EMISSIONS

Emission Rate (lbs/MWh)	CO2	NOx	SO2
New England	536.43	0.309	0.122
Imports	183	0.26	0.23
New Units	895	0.06	0.01

The production of electricity to support your product results in the emission of air pollutants such as carbon dioxide, nitrogen oxide, and sulfur dioxide. This graph compares the air emissions of (i) the regional system average, (ii) imports to New England, and (iii) a new natural gas power plant.

LABOR CHARACTERISTICS

Generating Workforce	Output (MWh)	Percentage
With Union Labor	26,168,997	22%
Without Union Labor	91,594,003	78%
Total	117,763,000	100%

*The label information percentage was obtained from the Massachusetts Department of Public Utilities. These values are for January 1 through December 31, 2024.

NOTES

* For more information on the Renewable Energy Portfolio Standard, visit the Massachusetts Department of Energy Resources website at <https://www.mass.gov/orgs/massachusetts-department-of-energy-resources>. You may also call First Point Power, LLC at (888) 875-1711 or email

* Electricity customers in New England are served by an integrated power grid, not particular generating units.
